Chief, Producers' Equipment Branch, ORR

Requirement for US Construction Equipment Price List

1. Producers' Equipment Branch is occasionally called upon to make comparisons between foreign and domestic construction equipment. The price of such equipment is an important consideration in any comparison, and whereas this office frequently has such information for items of foreign manufacture, it has very little for those domestically produced.

2. It has been determined that no one source in the Washington area is able to furnish US equipment price data on an industry-wide basis. Such information, however, can probably be obtained from the Construction Industry Manufacturers' Association, 135 South LaSalle Street, Chicago 3, Illinois. This organization is believed to have complete and up to date price lists for US construction equipment.

3. It is requested that price lists of construction equipment produced by the following firms be solicited from the Construction Industry Manufacturers' Association:
